Hacker Box

مدت دوره: ۱۸۰ ساعت

سرفصل دوره :

CEH / SANS sec 617 /SANS sec 580 (50 Hours)

- Kali Linux (Installation, Package Management , Driver Installation)
- Basic Commands in Kali Linux
- Hacking phase
- Information gathering (Foot printing)
- Scanning
- Nmap Zero to Hero
- Enumeration
- Password Cracking
- Sniffing
- Exploiting and Gaining Access
- Wifi Hacking (Zero to Hero)
- Hacking Windows 10 with MSF
- Encoding and Payloading
- Post Exploiting
- Hooking
- Protection From Exploit
- Antivirus ByPassing
- DLL Hijacking
- Session Hijacking
- Hacking Mobile PlatForms

SANS sec 542 / sans SEC 642 (50 Hours)

- **Intruduction To Web Penetration Test**
- **Testing Frameworks**
- **Web Application Security**
- **Configuration Testing**
- **Identity Testing**
- **Authentication Testing**
- **Authovization Testing**
- **Session Maugment Testing**
- **Input Validution Testing**
- **Testing For Ldap Injection and Injection**
- **Testing For Error Handling**
- **Testing For Weak Cryptography**
- **Business Logic Testing**
- **Client-Side Testing**
- **API Testing**

SANS sec 573 (Python for Hackers) (40 Hours)

- **Python Syntax and Programming**
- **Python Security Modeles**

(OS – Sys – Subprocess -Scapy -Request -Paramiko , ...)

- **Controlling File and Folders with Python**
- **Controlling Registry with Python**
- **Controlling System From Remote with Python (Socket Programming)**
- **Keylogger with Python**
- **Brute Forcer with Python**
- **Ssh and Telnet with Python**
- **DDos Attacks with Python**

- **DNS Enum with Python**
- **Virus and Ransomware Writing with Python**
- **Spoofing with Python**
- **Pass and Hash Cracking with Python**
- **Port Scanner with Python**
- **Vulnerability Scanning with Python**
- **Web Scanning with Python**
- **Pass Generator with Python**
- **Sending and Receiving Email with Python**
- **Execute Shell Command with Python**
- **Creak Reverse Shell with Python**
- **Wifi Hacking with Python**

SANS sec 560 (Enterprise Penetration Testing) (40 Hours)

- **Cam Table Overflow**
- **Vlan Hopping**
- **Stp Manipulation**
- **ARP Spoofing**
- **DHCP Starvation**
- **HSRP Attacks**
- **Routing Attacks**
- **Defense in Depth Techniques**
- **DNS Attacks**
- **Active Directory Attacks**
- **Network Capturing and Sniffing**
- **Email Server Attacks**
- **802.1x and Port Security Bypass**
- **Securing Network**
